Ananya Kothiyal

New York, United States (Open to Relocation) | ak12140@nyu.edu | (347) 367-9036 | LinkedIn | Portfolio

Junior Operations Analyst with experience supporting cross-functional technology organizations through operational performance tracking, KPI reporting, and process optimization. Skilled in building dashboards, monitoring adoption metrics, and preparing leadership-ready materials to support informed decision-making. Strong Excel, SQL, and Tableau capabilities with a track record of driving operational clarity across engineering and business stakeholders.

EDUCATION

New York University, Tandon School of Engineering, Brooklyn, NY — August 2024 – May 2026
Master of Science, Management of Technology

Vellore Institute of Technology, Chennai, India — Sept 2020 – July 2024
Bachelor of Technology, Computer Science with Artificial Intelligence and Robotics

EXPERIENCE

Operations Analyst, New York University, United States — Feb 2025 – May 2026

- Served as assistant to the Manager of Academics at NYU, supporting day-to-day operational and administrative coordination of academic programs.
- Built KPI dashboards to support operational monitoring, platform performance tracking, and stakeholder transparency.
- Served as liaison between academic and technical stakeholders, improving platform usability and adoption.
- Tracked productivity and usage metrics to support organizational transparency and operational standards.

Product Manager – Startup Engagement, Voushify, United States — Sept 2025 – Dec 2025

- Worked directly with the founder-CEO to support operational planning and performance tracking for a multi-stakeholder technology platform.
- Designed KPI frameworks and dashboards to monitor adoption, usage trends, and resource allocation across platform delivery cycles.
- Facilitated cross-functional coordination between business and technical teams to ensure operational alignment and delivery efficiency.

Data Analytics Intern, Tiger Analytics, India — May 2025 – Aug 2025

- Supported a marketing mix optimization engagement, querying multi-channel performance datasets in SQL to analyze spend efficiency, ROI trends, and channel attribution for a CPG client.
- Built and validated Tableau dashboards to surface budget allocation insights, enabling data-backed reallocation recommendations for client stakeholders.
- Synthesized analytical findings into executive-ready presentations summarizing channel performance trends and optimization opportunities for leadership review.
- Collaborated with cross-functional teams to translate business questions into measurable reporting solutions.

Business Analyst Intern, Denave India, India — Jan 2024 – July 2024

- Gathered and documented client requirements, converting business objectives into BRDs and functional specifications.
- Conducted stakeholder workshops and interviews to clarify scope, dependencies, and delivery timelines.
- Partnered with engineering teams to prioritize requirements and support implementation planning.
- Monitored post-implementation outcomes and identified opportunities for process optimization.

Technical Project Manager, VIT Chennai, India — Sept 2021 – April 2024

- Led end-to-end planning and delivery of cross-functional AI initiatives adopted by 15,000+ users, managing full project lifecycle from requirements through post-go-live support.
- Coordinated 5+ concurrent workstreams across engineering, design, and content teams, maintaining timelines and surfacing risks to achieve 100% on-time delivery.
- Facilitated stakeholder alignment sessions and maintained structured project documentation to support informed prioritization and decision-making.

Project Management Intern, NetSet Software, India — April 2023 – Sept 2023

- Supported delivery of a logistics platform by translating customer requirements into prioritized tasks in collaboration with engineering teams.
- Assisted with go-live planning, stakeholder coordination, and onboarding activities to ensure smooth product rollout.

- Partnered with engineering teams to break customer requirements into actionable tasks, improving post-sale efficiency by 20%.

SKILLS

Operations & Analytics: KPI Design & Reporting, Performance Metrics Analysis, Process Optimization, Operational Monitoring, Dashboard Automation

Tools & Systems: SQL, Tableau, Power BI, Advanced Excel (Modeling & Tracking), PowerPoint (Executive Materials), Jira, Confluence

Collaboration & Delivery: Cross-Functional Coordination, Stakeholder Alignment, Agile & Waterfall, Change & Adoption Support, Requirements Documentation

PROJECTS

VisioHealth – AI-Powered Disease Prediction & Risk Dashboard

- Led user research and validation for AI-powered facial recognition in healthcare, improving disease prediction accuracy by 85%.
- Built a Tableau dashboard with dynamic filters and trend analysis to visualize patient risk factors and highlight high-risk groups.

Process Automation for Rental Operations

- Designed workflow automation for customer onboarding, invoicing, and payments, reducing manual effort by 40% and increasing transaction completion rates by 25%.
- Led requirement gathering from stakeholders to ensure product-market fit and adoption readiness.
