Ananya Kothiyal

Brooklyn, NY (Open to Relocation) | ak12140@nyu.edu | (347) 367-9036 | LinkedIn

Early-career Product Manager with experience building platform products at the intersection of user discovery, data analytics, and AI-powered workflows. Proven ability to translate localized user needs into scalable product solutions, drive cross-functional execution, and use data to identify pain points and growth opportunities. Deeply curious about creator ecosystems, monetization platforms, and the role of AI in enabling measurable brand outcomes.

EDUCATION

New York University, Tandon School of Engineering, Brooklyn, NY — August 2024 – May 2026
Master of Science, Management of Technology

Vellore Institute of Technology, Chennai, India — Sept 2020 – July 2024
Bachelors in Technology, Computer Science with Artificial Intelligence and Robotics

EXPERIENCE

Product Manager – Platform & Ecosystem, Voushify, New York, NY — Sept 2025 – Dec 2025

- Owned end-to-end product lifecycle for a dual-portal recommendation platform connecting students, recommenders, and universities — designing scalable features that optimized the collaboration journey across all three user segments.
- Led user discovery through interviews and workflow analysis to surface localized pain points; abstracted key challenges into prioritized product requirements and feature specifications.
- Collaborated with regional stakeholders to identify localized needs and design unified product solutions that scaled across diverse user groups.

Data Analytics Intern, Tiger Analytics, Chennai, India — May 2025 – Aug 2025

- Applied SQL and Python to analyze large-scale behavioral and transactional datasets — identifying user adoption patterns, retention trends, and revenue growth opportunities to inform product and GTM decisions.
- Built and maintained Tableau and Power BI dashboards tracking customer lifecycle KPIs and feature performance; standardized metric definitions across Customer Operations, RevOps, and Finance teams.
- Automated recurring analytics workflows, improving delivery efficiency by 40% and freeing team capacity for strategic analysis.

Business Analyst Intern, Denave India, Noida, India — Jan 2024 – July 2024

- Partnered with product and engineering teams to convert user and business needs into Jira-tracked user stories and BRDs; supported iterative delivery cycles through sprint planning, reviews, and stakeholder updates.
- Monitored platform usage and adoption metrics post-implementation to identify improvement areas and inform incremental product iterations.
- Performed competitive benchmarking and market research to identify product opportunity gaps and support strategic prioritization decisions.

Project Management Intern, NetSet Software, Punjab, India — April 2023 – Sept 2023

- Supported go-live of a logistics SaaS platform by translating customer requirements into prioritized engineering tasks and coordinating cross-functional execution — improving post-sale efficiency by 20%.

LEADERSHIP

Computer Science Graduate Assistant, New York University, NY — Aug 2025 – May 2026

- Tracked platform usage metrics and adoption gaps; acted as liaison between faculty, students, and technical teams to improve usability and drive platform adoption.

Technical Project Manager, AI Department, VIT Chennai — Sept 2021 – April 2024

- Acted as Product Owner for cross-functional AI initiatives adopted by 15,000+ users at national-scale conferences — gathered requirements, balanced scope, and aligned delivery priorities across multiple teams.

SKILLS

Product Management: Product Lifecycle Management, Platform & Ecosystem Products, User Research & Discovery, Feature Prioritization & Roadmapping, PRDs & User Stories, Monetization & B2B Products, AI-Assisted Prototyping, Go-to-Market Strategy, Scalable Product Design

Analytics & Data: SQL, Python, Tableau, Power BI, KPI & Adoption Metrics, Behavioral & Transactional Data Analysis, Customer Lifecycle Analytics, Ad Hoc Analysis, Data Validation

Execution & Collaboration: Cross-Functional Leadership, Stakeholder Alignment, Agile Delivery (Jira, Confluence), Multilingual Collaboration, Figma, MS Office

PROJECTS

VisioHealth – AI-Powered Disease Prediction & Risk Dashboard

- End-to-end developed an AI-driven platform using machine learning for early disease detection and facial recognition for patient data retrieval; built a Tableau dashboard with dynamic filters to visualize risk trends and enable data-driven clinical decisions — demonstrating ability to design AI-powered product solutions from concept to deployment.

Process Automation for Rental Operations

- Gathered stakeholder requirements and designed workflow automation for customer onboarding, invoicing, and payments — reducing manual effort by 40% and improving transaction completion rates by 25%.
